EDUCATION

Punjabi University, Patiala
Bachelor of Electronic and Computer Engineering — 8.27 GPA (2020 – 2024)

SKILLS

- **Manual Testing:** Functional Testing, Smoke Testing, Regression Testing, Retesting
- **API Testing:** Swagger, Postman, Apidog
- **Bug Reporting:** Excel, Mantis, Trello
- **Automation Testing:** Python, Playwright
- **Version Control:** GitHub
- **Databases:** Basic knowledge of SQL and MongoDB

WORK EXPERIENCE

Eminence Technology

Associate Quality Analyst *March 2025 – Current*

- Reviewed user needs and system designs to create useful test scenarios.
- Created and followed test plans and test cases to make sure the software worked well.
- Looked at the development process to find ways to make it more accurate and efficient.
- Reported and tracked bugs using tools like Mantis.
- Worked closely with developers to spot and fix issues early in the development process.

Cybernauticstech Pvt. Ltd.

Junior Quality Analyst *June 2024 – Feb 2025*

- Conducted functional and API testing using Postman; logged and tracked bugs via Mantis.
- Collaborated with developers on early detection of defects, improving build stability.

PROJECTS

Buildermatch.ai

- Tested end-to-end homeowner and tradesperson journeys: AI job wizard, quote and counter-offer flow, Stripe escrow payments, live ETA tracking, and multi-visit milestone jobs.
- Validated AI features (photo-based job descriptions, matching and escalation, RAG support chatbot) against real-world job scenarios.
- Verified WhatsApp/SMS/email notifications, PECR/GDPR consent flows, and admin and partner revenue-share modules.
- Logged and tracked defects in Mantis, and ran cross-browser and responsive regression testing.

Canterbury Punting

- Tested a multi-tenant booking platform with an EasyJet-style booking flow (tour → date/slot → passengers → seat map → add-ons → payment).
- Validated real-time seat locking including concurrent-booking and lock-expiry scenarios, to prevent double bookings.
- Tested the pricing engine across category-, slot-, and channel-based (website vs POS) pricing, discount codes, and bulk pricing templates.
- Verified Stripe and PayPal payment flows, plus the cancellation and refund policy engine.
- Performed role-based access testing (Super Admin, Admin, Manager, Staff) and end-to-end regression across web, admin panel, and POS tablet interface.

Danjoo.AI

- Worked on an AI-driven voice calling and campaign management platform built around Admin and Customer panels, where the Admin onboards and manages customer accounts.
- Supported two customer account types: Organization accounts, which allow onboarding of staff members and individual users, and standalone Individual accounts.
- Tested the AI agent creation and training workflow, in which conversational AI agents are trained and voice-enabled using ElevenLabs integration.
- Validated the core campaign management functionality, covering campaign creation, execution, and live outbound calls placed to real customers.
- Verified real-time agent-to-customer call handling, including the call transfer feature enabling agents to hand off active calls to other agents.

Joyers

- Worked on a social media application enabling users to create and share posts, and engage through likes, comments, and reposts.
- Tested core social interaction features including a dedicated user profile section for managing personal content and activity.
- Performed functional and usability testing across posting, engagement, and profile modules to ensure a smooth and reliable user experience.
